LIBESKIND DESIGN

flow, wellness in the city

# Daniel Libeskind interprets City™ Spa

By a twisting of the circle, a square opens into the water. This is how Flow is born: the new Jacuzzi® hot tub designed by world famous architect Daniel Libeskind. A clever play of classical geometries, with a circular base, that spins around enveloping Jacuzzi® City™ Spa. Flow is designed for any environment, but in particular for urban spaces. From functional object dedicated to well-being, this hot tub is transformed into a luxurious design icon, equipped with the performance and technology of the incomparable Jacuzzi® hydromassage.

## BORN IN THE CITY

Designed to be installed anywhere, it is naturally destined to prestigious urban installations, such as lofts, rooftop terraces & interior gardens. With a floor loading weight of only 230 kg/m<sup>2</sup>, Flow lends itself to create a unique space of wellbeing in any environment.

## TOTAL WELLNESS

The result of the most exclusive Jacuzzi® technology, Flow is equipped with Power Pro® jets that are positioned to provide complimentary seats of relaxation and invigoration, ensuring the delivery of the original Jacuzzi® hydromassage for a complete wellness experience.

## A PLEASURE TO BE SHARED

Thanks to a careful study of ergonomics and internal volumes, Flow has been designed so as to provide, together with the avant-garde aesthetic lines, an optimum capacity that creates a great welcome. The two lounges allow total relaxation, comfort and a full sharing of moments dedicated to well-being.

## DESIGN

Flow is born with a circular base, which twists gradually to become a squared top deck. Its shape resembles the Roman baths and Baroque fountains, and is reminiscent of the rotary motion of a sea vortex. Made with advanced technological materials, Flow offers a futuristic vision of urban design and effectively evokes the search for harmony of body and soul.

<b>FEATURES</b>		
Length x width	cm	Ø 224 (200 x 200)
Height	cm	81
Seats	n.	2 lounge
